CASING EQUIPMENT

## SOLID STEEL CENTRALIZER

Designed and fabricated from ASTM grade steel, our SS Solid Steel Centralizers deliver maximum performance in the most challenging conditions.

Available in various blade configurations, their leading edge blade design minimizes torque and drag. Blade styles include straight, spiral and half-moon shape, which minimizes contact area while maintaining required standoff.

Our SS Solid Steel Centralizers are fully customizable for any application. We can also accommodate special inside diameters, outside diameters, lengths or set screws.

Custom designs can also be engineered upon special request for unique applications.
