LENGTH

## PERFORM

### Improved Injector

- 120K of intermittent pulling at max speed of 80 ft/min
- Injector head pulls 50,000 lbs at 200 ft/min
- Optimized core and tubing guide extends tube life span

### Extra Wide Reel

- 166" diameter x 96" core x 117" flange
- 117" flange diameter holds 24,000 ft of 2-3/8" tubing
- Robust levelwind assembly designed for large tubing loads
- Reel capable of supporting different tubing size without reel change
- Reel shafts handle gear driven loads without flexing

### Custom Built

Every Propell Coiled Tubing Unit is customized to perfectly suit the application it is intended for, the environment it must work in, and the business strategy of our customers.

### Custom Cabins

Fully customizable cabin design features ultra-lightweight options along with cold/hot weather packages. Lightweight modular design for increased customer options.
